

WHAT IS CLAIMED IS:

1. A composition for dermatological and/or cosmetic use intended for the treatment of acne, seborrheic dermatitis and skin disorders related to the formation of comedos, characterized in that it comprises, as active principle, at least one lipophilic antioxidant chosen from the group consisting of gallates, flavonoids, butylated hydroxytoluene (BHT), butylated hydroxyanisole (BHA), octadecenedioic acid and hydroxydecanoic acid and at least one second active principle, a hydrophilic antioxidant chosen from the group consisting of mannitol, vitamin C, lysine azelate, rutin and quercetin.
- 15 2. The composition as claimed in claim 1, characterized in that the lipophilic antioxidant is dodecyl gallate.
- 20 3. The composition as claimed in claim 1, characterized in that the antioxidant is propyl gallate.
4. The composition as claimed in claim 1, characterized in that the antioxidant is octyl gallate.
- 25 5. The composition as claimed in any one of the preceding claims, characterized in that the amount of active principle is between 0.0001 and 20% by weight of the composition and preferably between 0.0001 and 10% by weight of the composition.
- 30 6. The composition as claimed in either one of claims 1 and 2, characterized in that the amount of active principle is between 0.001 and 2% by weight of the composition.
- 35 7. The composition as claimed in any one of the preceding claims, characterized in that it does not

comprise excipients capable of oxidizing under the conditions of use.

8. The use of a lipophilic antioxidant in the preparation of a dermatological and/or cosmetic composition for the treatment of acne and/or of skin disorders due to the formation of comedos.

9. The use of a hydrophilic antioxidant in combination with a lipophilic antioxidant in the preparation of a dermatological and/or cosmetic composition for the treatment of acne and/or of skin disorders due to the formation of comedos.

10. The use as claimed in either one of claims 9 and 10, characterized in that the lipophilic antioxidant is chosen from the group consisting of gallates and flavonoids.

11. The use as claimed in claim 10, characterized in that the hydrophilic antioxidant is chosen from the group consisting of mannitol and vitamin C.

12. A process for rendering the sebum fluid, characterized in that it comprises the application, to the skin or scalp, of a composition as claimed in one of claims 1 to 8.
